Premium quality micro & drip
irrigation products for over thirty
years Patented RO-DRIP & RO-
DRIP XL drip tape deliver water &
nutrients directly to a plant's root
zone via a precision-molded
channel. A vortex action within the
channel creates turbulence, keeping
particulate moving through the tape.
RO-DRIP is used for row crops,
greenhouses / nurseries and field
flowers. SPOT-SPITTER, the
original mini-sprayer, offers a
variety of wetting patterns and flow
rates making it a cost-effective
versatile solution for mini-spray
nursery & greenhouse applications.
